

Longrock Coastal Protection Newsletter - August 2019

Rock Armour Works on Longrock Beach completed

Completed Works

The works to construct 350m length of rock armour coastal protection completed on 12th August 2019. In addition to the new sea defence, new public amenity space has been created in the area between the rock armour and the South West Coastal Path. New picnic benches funded by Councillor Simon Elliot have been installed alongside informal granite rock seats. The new access ramps have improved access for the public to the beach.
