

Longrock Coastal Protection Newsletter

February 2020

Marazion Marsh weir works continue

On Site Progress

The ducting works in the footway and road crossing have been completed to facilitate the new power supply for the automated penstock.

Forthcoming Works

- Completion of the flap valve replacement on the outfall pipe
- Installation of pre-cast concrete weir wall units and automated penstock
- Installation of the new trash screen to the weir

Public Information

The steps and a platform on the marsh embankment will be modified to provide site access to the weir. **These are for construction access only and are not for public use.**

To keep up to date with ongoing scheme updates, please visit the Cormac Major Projects page:
