

## Keeping Cornwall moving in winter

**925 miles**

of road are covered by the gritting network, which is slightly more than the distance from Land's End to John o' Groats

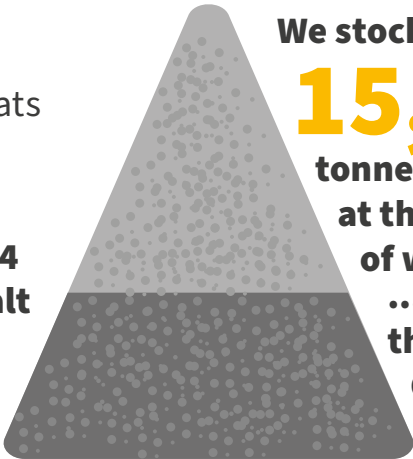

**84 tonnes**

Approximately 84 tonnes of rock salt is used for each gritting run

**x1,100**

Each time we salt an area of 10,400,000m<sup>2</sup>, that's over 1100 times the size of Twickenham rugby pitch

We stockpile

**15,000**

tonnes of salt at the start of winter...

... 50% more than the minimum Government recommendation

We have **78** drivers on stand by from November to March

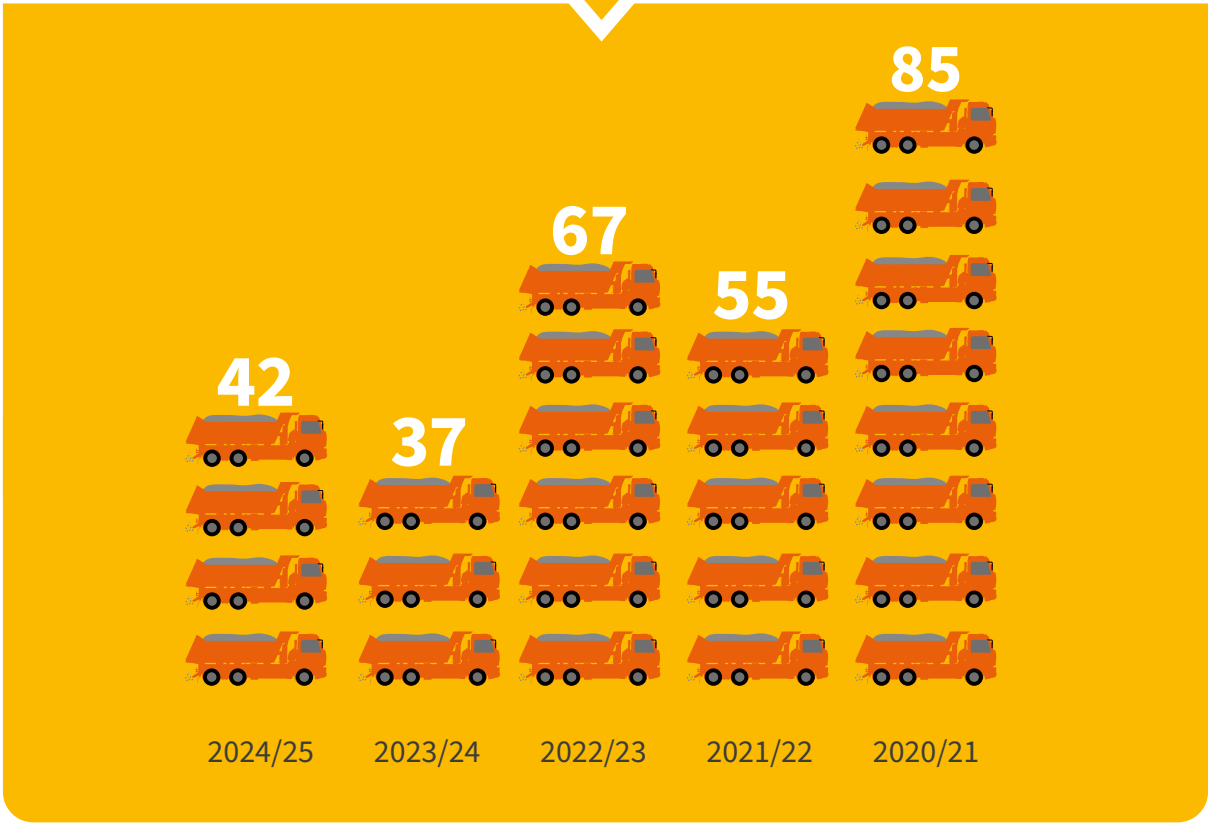

GRIT BIN

**700+**

yellow grit bins for use by residents on pavements and roads, not private driveways

### How many days (or nights) the gritters were sent out

We have a fleet of

**28 gritters**

In 2024/25, we treated 39,063 miles of road, which is equivalent to circling the earth more than one and a half times.
